FAQ's

01 Are we licensed?

Yes, through the State of Maryland, Maryland Department of Health, Office of Health Care Quality. RN supervision of aides with medication reminders. License #R2925.

02 Do we perform background checks?

Yes, prior to hiring a criminal background check is completed, as well as, at least 3 reference checks.

03 How are our Caregivers selected?

First and foremost, they must be compassionate with a heart for seniors. Each goes through a 5-step screening process including a comprehensive skills assessment.

04 Will an RN help develop a care plan?

The patient's physician ultimately drives the care plan. However, if the level of care benefits from a visit with our RN, it will be arranged. To ensure the plan is followed precisely, care notes will be monitored regularly.

05 Do we accept insurance?

We accept Long Term Care and private pay. Medicare does not cover home care services, and Medicaid works solely with their certified agencies.

06 What if you are dissatisfied with your Caregiver?

Contact us, and explain the reason, so that we can find a more suitable fit.

07 How do we document services performed?

Caregivers document services on our system ClearCare. Management monitors, and families have access, as well.
